Experience

iOS Developer – Getaround
US & Europe iOS and Android car-sharing platform.

Sept. 2024 – March 2025
Ended due to Getaround US shutdown

- Revamped the signup/login flow, migrating from UIKit to SwiftUI with a clean architecture to improve UX and conversion rates.
- Modernized legacy code with modern Swift patterns (async/await, Combine, Dependency Injection) and robust XCTest/XCUITest testing.
- Designed and implemented global UI components in collaboration with designers.
- Collaborated with backend teams to define and iterate on REST API specifications
- Developed U.S.-specific features, ensuring seamless synchronization with U.S. teams across time zones for alignment on product requirements and technical implementation.

Co-Founder, iOS Developer – AppyCare

Nov. 2022 – Sept 2024

4-person startup providing a French medication management app for both sighted and blind individuals.

- Implemented a hybrid architecture blending Coordinators, MVVM, and an offline-first custom storage strategy, optimizing Core Data performance through batch updates, and background contexts.
- Worked on accessibility by collaborating with beta testers and dedicated focus groups to fully support VoiceOver, Dynamic Type, and high-contrast modes.
- Developed a secure backend compliant with French HIPAA-equivalent regulations, while keeping most sensitive data offline to meet GDPR and healthcare standards.
- Oversaw the complete App Store submission process, ensuring strict adherence to Apple Guidelines.
- Worked on various topics such as architecture, UX/UI, backend infrastructure, database optimization and a custom tracking solution that anonymizes analytics data and minimizes third-party dependencies.

iOS Developer — Lunabee Studio

Sept. 2021 — Oct. 2022

Mobile development agency with clients across Europe, including hotel chains.

- Improved the KYC (Know Your Customer) flows to ensure secure hotel bookings.
- Migrated Objective-C code to Swift, applying modern best practices to existing codebase.
- Refactored features using Coordinator-MVVM and Repository patterns for modularity and scalability.
- Collaborated with non-technical clients to translate requirements into comprehensive technical specifications.

Skills

- 🦅 Swift
- 🗄 Core Data
- 🥞 UIKit
- ⌥ Git
- 🦅 SwiftUI
- ≔ Unit / UI Testing
- ⚙ CI/CD
- 🔲 App Store Submissions
- 🖧 REST API
- ≔ Clean Architectures

Communication, Continuous Learning, Problem-Solving, Team Collaboration

Education

- *License in Computer Science* – ESTIAM Lyon (2022)
- *University in Computer Science* – IUT Informatique Lyon (2021)
- *Self-Taught & Continuous Learning* – side-projects, online courses, and tech explorations

Side Projects

AppyWork: Web Developer
Simplifying the search and booking of coworking spaces in France.

- Ⓝ NextJS
- ▲ Vercel
- 🌬 Tailwind CSS
- ⚛ React
- ⚡ Supabase

Simple Poetry: iOS and Web Developer
A platform for discovering and exploring poetry.
